

Talenom

Post-results report Q1 2022

First disseminated
27.4.2022 11:43

Growth story remains attractive

- We reiterate our Accumulate recommendation with a target price of EUR 12.00. The company's international expansion appears to progress on track. At the same time, organic growth remained healthy in Finland, the company's main market, and the EBITDA margin remained strong despite the negative impact of acquisitions on profitability. We estimate that there is still plenty of growth potential in the existing as well as new markets both organically and through acquisitions as the digital transition is advancing particularly in Europe.
- **Q1 profit:** Talenom's operating profit topped expectations even though revenue growth was slightly more moderate than anticipated. However, we see that the operative performance was not quite as solid as the reported figures indicated – we understand that operating profit was supported by the deviation of M&A-related additional transaction prices from estimates, which is why other operating income was higher than normal in Q1. We estimate that operatively EBIT was closer to expectations.
- **International expansion.** Talenom's international expansion appears to progress on track. Profitability in Sweden strengthened essentially in Q1 with the EBITDA margin rising to 13% (Q1 2021: 4.5%) when the expanded scale of operations carried the costs of sales activities as well as start of support and management functions better than last year. The company said that new customer acquisition went slightly better than expected in Sweden in Q1. However, the sales organisation in Sweden is still relatively small and the company will continue investments in it. The implementation project of own software in Sweden has advanced according to plan in Sweden, and an extensive implementation is still planned for the autumn of 2022. In addition to higher profitability, the company sees that the extensive implementation will also have a positive effect on new customer acquisition in Sweden. The company has only just started operations in Spain and is investigating the market and preparing to implement a small customer concept. Acquisitions will continue, but the company says that the focus will shift more visibly towards new markets and Sweden.
- **Valuation.** Our target price of EUR 12.00 corresponds to the value indicated by our DCF model and an EV/EBITDA multiple 14x on our 2023 forecasts.

Investment case

- Defensive growth market:** In 2019, the Finnish accounting market totalled around EUR 1.2bn. Annual growth in this market was 5.4% on average in 2001–2019, which is clearly faster than economic growth in general. In addition to healthy growth, the sector is very defensive – the sector grew even during the financial crisis in 2008–2009.
- Competitive advantage in technology and service:** Automation gains and economies of scale are sizeable in this sector, so it is inevitable that consolidation will continue. Digitalisation will accelerate consolidation, as small, manually operating accounting firms do not have sufficient resources to develop their operations. Talenom’s business model is based on efficiency brought by in-house software development, which means that specialists may focus on value-added services. This will improve customer satisfaction and enable additional sales to existing customers.
- Additional growth from international expansion as well as new services and customer groups:** Talenom expanded operations to Sweden in 2019 and is investigating other European countries for potential expansion. Internationalisation offers significant growth potential for the company. Talenom has profound expertise in contract law and taxation, among other things, and the company’s strategy is to provide services to SMEs widely on matters related to business management. The company has also expanded operations to smaller companies with new business based on digital distribution and enhanced its product offering to banking services, among other things.

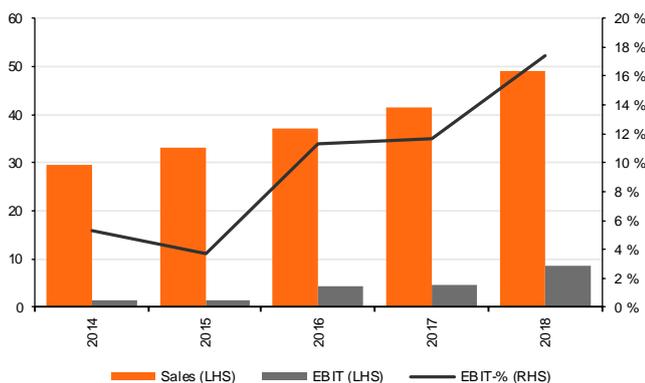

Drivers

- International expansion:** Talenom’s international expansion started in Sweden in 2019 and now the scope of expansion is considerable. New countries are actively charted.
- Increasing importance of value-added services:** The automation of accounting has meant that specialists have more time for value-added services, which increases sales per customer and improves customer experience and the personnel’s job satisfaction.
- Value-creating acquisitions:** Talenom has accelerated acquisitions both in Finland and Sweden in recent years. Talenom has very successfully integrated acquisitions and raised their profitability, which creates shareholder value coupled with inexpensive acquisition prices.

Risks

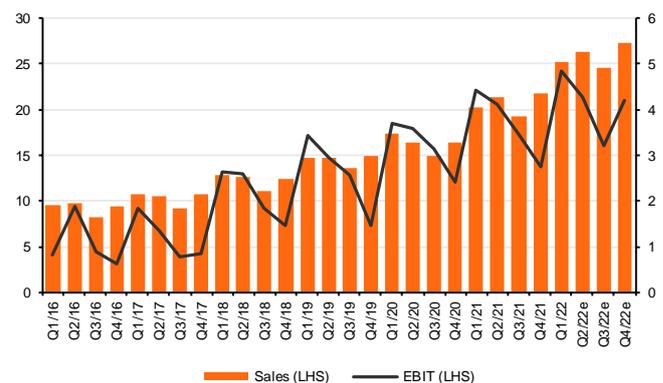

- Intensifying competition:** Advancing automation and digitalisation in the sector will probably lead to intensifying price competition in the future.
- Failure in international expansion:** There is not yet any proof that the profitability of business operations in Sweden can be raised through the localisation of software that increases automation.
- Goodwill and intangible rights:** The amount of goodwill and intangible rights is high in Talenom’s balance sheet. If profitability declined sharply, these items would involve uncertainty. However, in our view the risk is very low.

Annual sales and EBIT

Q1 results vs. forecasts

Talenom's revenue grew 24% in Q1 (OP: +27%), of which around one-third was organic growth (OP: +10%). Organic growth was based on a growing customer base and increasing sales of value-added services mainly in Finland. Profitability was stronger than expected. The EBITDA margin improved YoY in both Finland and Sweden. In Finland, the EBITDA margin strengthened with the support of increasing automation. In Sweden, the expanded scale of business carried the costs from sales activities and start of support and management functions better than last year. However, we see that the Group's operative performance was not quite as solid as the reported figures indicated – we understand that earnings were supported by the deviation of M&A-related additional transaction prices from estimates, which is why other operating income was higher than normal in Q1. We estimate that operatively EBIT was closer to expectations.

Forecast revisions

Talenom's 2022 guidance remained intact – the company expects 2022 net sales to be around EUR 100–110m and EBIT to be EUR 15–18m. Our forecasts adjustments are minor after the Q1 report.

Peer companies

It is difficult to find listed peer companies for Talenom. The company's operating model differs from companies that provide accounting services, such as Aallon Group which is listed in Finland, but also from software houses, such as Admicom or Fortnox. We have gathered different types of peer companies in the table below. In our view, Enento (former Asiakastieto) is the closest peer among Finnish peer companies based on the defensive nature of its business and good competitive position.

As shown by the table, there are great valuation differences between the companies. The valuations of software houses whose profitability and growth are high are naturally higher compared with service companies whose business is clearly less scalable.

In terms of sales growth and profitability, Talenom is between software houses and service companies.

The client is always responsible for the financial result of the investment decisions.

OP Corporate Bank plc sets a target share price for companies under its coverage at any given time. OP Corporate Bank plc does not issue recommendations or target prices for bonds. The target share price is set at a level where the share price is forecast to be 12 months later. The target prices are company-specific, and the applicability of the different valuation methods used in determining the target price can differ considerably between companies.

OP Corporate Bank plc may set a target level for the underlying investments of asset classes (equity indices, interest rates, currency and commodities) subject to analysis any given time. The target level represents the analyst's view on how the analyst expects the value of the investment to change from the target level on a given horizon. The grounds for the target level are investment-based, and the basic principles are based on theories of economics and finance. Calculations and methods are based on standard econometric tools and methodology as well as publicly available information and statistics on the investment instruments concerned.

OP Corporate Bank plc mainly uses the following valuation methods when determining target prices on shares: DCF = Discounted Cash Flow, peer group valuation, analysis based on absolute valuation parameters, analysis based on historical valuation parameters, sum-of-parts, analysis based on market and company outlook, analysis based on news flow.

OP's Research team has abandoned the Neutral recommendation as of 1 October 2020 and started to use a new four-rank recommendation structure: Buy, Accumulate, Reduce and Sell. The recommendation is relative to the expected return of the share within the next 12 months. If the return of the share is expected to exceed 15% within the next 12 months, the recommendation is Buy. If the expected return is 5–15% within the next 12 months, the recommendation is Accumulate. If the expected return is (-5)–(5)% within the next 12 months, the recommendation is Reduce. If the expected return is below (-5%), the recommendation is Sell. Expected return is measured as upside potential of a stock calculated as a percentage difference between target price and current price. This includes dividends.

The recommendations and target prices of OP Corporate Bank plc for shares are principally updated four times a year in connection with the quarterly earnings of the companies. It is always possible to change the recommendations and target prices also at other times, whenever motivated. The updating frequency of recommendations and target prices has not been restricted.

The recommendations or target prices given are based on assumptions that may not be realised and they do not guarantee that the price of the security will perform as estimated. Due to the nature of the securities market, even moderate changes in a company's operations or operating environment or general fluctuations in the securities market can result in considerable changes in value. The past performance of a security does not guarantee its future performance. A numeric sensitivity analysis for the earnings forecasts is provided in connection with the cash flow model. When investing in individual shares, the investor may lose all or part of the investments.

OP Corporate Bank plc's divisions within Banking and Investment Services engage in own-account trading and issuing of financial instruments, and also offer services related to share issues and investment advice regarding financial instruments and engage in selling, buying and brokerage of securities on behalf of clients. As stipulated by the OP Financial Group's conflict of interests policy, Corporate Finance operations which relate to issuance of financial instruments on behalf of clients are separated from investment research and brokerage operations both physically and

operationally. In addition, it has been identified as a conflict of interests situation that the Chair of OP Corporate Bank plc's Board of Directors is a member of Kesko Corporation's Board of Directors. It is estimated that this conflict of interests situation does not compromise the objectivity and independence of the investment research on Kesko Corporation produced by OP Corporate Bank plc's Research Team.

The analysts of the Research Team and their related parties may own securities issued by the companies analysed by the Research Team. The analysts of OP Corporate Bank plc may receive a merit pay bonus that is subject to the total return of OP Corporate Bank plc or one of its divisions or business areas. The salaries of the analysts are not directly dependent on the execution of an individual investment banking assignment executed by OP Corporate Bank plc or another company pertaining to the same group.

The holdings of OP Corporate Bank plc and other companies pertaining to the same group exceed the 5% limit in Terveystalo Plc and SRV Group Plc through the shareholdings of Pohjola Insurance Ltd. OP Corporate Bank plc or other companies pertaining to the same group do not have holdings of more than 5% in other companies subject to analysis. The exception to OP Financial Group's obligation to disclose shareholdings is applied to this calculation of ownerships in companies subject to analysis. In accordance with the exception, the securities owned by funds managed by OP Fund Management Company Ltd in Finnish companies and the votes carried by such shares are excluded from the ownerships calculated here for the companies pertaining to the same group with OP Corporate Bank plc. The holdings of OP Bank Group Pension Fund and the votes carried by such holdings are also excluded from said ownership and voting rights figures.

OP Corporate Bank plc, or another company pertaining to the same group, does not act as a market maker or other liquidity provider for the stocks of issuers subject to analysis. OP Corporate Bank plc, or another company pertaining to the same group, may, however, act as a market maker or other liquidity provider for the debt instruments of issuers subject to analysis. OP Corporate Bank plc may hold a position in a financial instrument mentioned in this research report.

OP Corporate Bank plc's business functions strive to actively establish relations with different issuers for the provision of various services offered by OP Corporate Bank plc. Within the past 12 months, OP Corporate Bank plc, or another company pertaining to the same group, has acted as a lead manager or co-manager in the public issue or offering of securities by the following companies subject to analysis or has been party to an agreement with an issuer concerning the provision of investment banking services at the time the analysis was released or within the past 12 months*: Ahlstrom-Munksjö, Citycon, Finnair, HKScan, Kreate, Puuilo, Rettig, Sanoma, TVO and YIT.

OP Corporate Bank plc conducts commission-based equity research for certain companies under coverage where the research has been provided against payment under an agreement concluded with the company under coverage. The payment charged on this kind of research is not significant from OP Corporate Bank plc's perspective, and OP Corporate Bank plc estimates that it does not compromise the independence of OP Research. At the time of dissemination of this report, OP Corporate Bank plc had an agreement on commission-based research with the following companies: Exel Composites, Rapala, Scanfil and Talenom.
