CEO Mika Riekkola: We expect the profitable growth to continue after the record second half

"The year 2021 was still very much affected by the pandemic, which was reflected on the business environment of Viafin Service in different ways. However, we systematically continued to implement our strategy and continued our profitable growth during the fiscal year 2021. The last quarter of the year was strong as we expected. The fourth quarter revenue amounted to 20 MEUR and the EBITA was 2.2 MEUR (10.9 percent of revenue). The revenue for the second half of the year was 35 MEUR and net profit 2.4 MEUR marking the all-time best fiscal half year result for the company.

The total revenue for 2021 was 61.2 MEUR topping the 2020 total revenue (57.9 MEUR) by 5.8 percent. Maintenance services comprised 80 percent (49.0 MEUR) compared to 20 percent coming from our project services business (12.2 MEUR). The EBITA-margin level of the company was a good 7.0 percent. The margin level is again a demonstration of how our business model is working to drive profitable growth in changing market conditions. The operative cash flow stayed at strong levels. Our year end cash position of 17.3 MEUR is a solid foundation of which to continue our growth strategy.

During 2021 we delivered on our strategy to expand our geographic presence and service offering. In January 2021 we bought Astepa Oy in Lappeenranta which now operates as our regional service and maintenance unit in North-eastern Finland. In addition, we opened new service units in Vantaa, Jyväskylä and Kokkola and a unit focused on process piping solutions in Äänekoski. Hence our current network of 21 regional units has widened our geographic presence and ability to serve our customers locally and efficiently. The ability to set up new units is also a demonstration of our attractiveness as an employer among professionals in our field. In total we strengthened our organisation with many new recruitments and grew our staff over 20 percent with 68 new employees in total.

We are excited to continue the collaboration with Gasgrid Finland. During the third quarter Viafin Gas signed an agreement to deliver service and maintenance services to Gasgrid Finland. This service agreement strengthens our position as a leading maintenance service provider to different gas industry systems and solutions and lays a strong foundation for the long-term development of the business of Viafin GAS.

The market situation for 2022 looks stable in both maintenance and project services, although there are some identified uncertainties. The spreading of the Omicron variant clouds the short term visibility of the market environment. In addition, during the beginning of the year some of our customers have faced uncertainty in form of employee strikes and prolonged delivery times regarding some materials.

We see that there are significant growth opportunities in the service and maintenance market, and we continue to strengthen our offering to be able to serve our customers locally, cost efficiently and in a customer centric manner. In our view we are well positioned to serve our customers maintenance service needs and investment plans during 2022. We continue to

evaluate M&A targets selectively and in line with our strategy. The board of directors has commenced the preparations for updating our strategy ending 2022. We believe the process will be completed by fall this year.

We estimate our revenue to grow in 2022 compared to 2021 (61.2 MEUR) and EBITA to grow compared to 2021 (4.3 MEUR).

The year operating environment in 2021 was challenging due to the pandemic especially during the first half of the year. New waves of infections required flexibility and carefulness from us and our customers. However, we were able to grow profitably in line with our strategy. Our customers, employees and partners have enabled this with their professionalism and great attitude. We thank you all for that. We will continue to focus on profitable growth and being the most efficient and customer centric service provider in our market."

Economic development

In July–December 2021 the revenue increased by 18.2 percent, thus being MEUR 35.0 (29.6). Earnings before interest, taxes, and amortizations (EBITA) increased to MEUR 3.0 (2.3) thus being 8.7 (7.8) percent of the revenue. The net profit for the period, MEUR 2.4 (1.8) was not subjected to non-recurring expenses. The decrease was mainly due to an increase of revenue earnings per share were EUR 0.57 (0.44).
